

Provide Effective Feedback and Feedforward to Peers

The ability to provide effective, constructive feedback is a critical skill. Whether you're reviewing a colleague's work, providing input on team performance, or coaching someone toward improvement, **feedback** and **feedforward** are invaluable tools for personal and professional growth. This resource will guide you through how to evaluate and respond to your peers' work in ways that promote learning, development and quality.

Key Elements to Consider When Providing Feedback/Feedforward

1. Contributions to Team Efforts

- **Feedback**

Evaluate how your peers' contributions to the task. Are they engaged and actively sharing ideas that advance the work? Be specific about the quality of their input.

- Example: "Your contribution provided us with a solid idea about expanding our market analysis, which pushed the group to think more strategically."

- **Feedforward**

Suggest ways to further enhance their involvement.

- Example: "During our team meetings, try to encourage others to build on your idea, which can help refine our strategy even more."

2. Facilitating Contributions from Others

- **Feedback**

Assess how well your peers encourage inputs from the rest of the team. Are they actively engaging everyone and fostering collaboration?

- Example: "You did a great job by summarising everyone's points clearly, which helped us move forward."

- **Feedforward**

Suggest how they can elevate their role in fostering team inclusivity.

- Example: "As a team, we should try to engage quieter members. This will make sure we benefit from everyone's perspective. You could email/message them for inputs if they are too shy to put ideas forward during our meetings"

3. Individual Contributions Outside of Meetings

- **Feedback**

Evaluate the quality and timeliness of tasks completed individually.

- **Example:** "Your financial analysis was thorough and helped our project stay on track."

- **Feedforward**

Offer advice on how to strengthen their individual contributions in the future.

- **Example:** "Before next meeting, provide a summary of your findings to the group beforehand, so we can integrate them more seamlessly into our discussions."

4. Fostering a Positive Team Climate

- **Feedback**

Reflect on how your peer contributes to a positive and supportive team environment.

- **Example:** "You maintained a really positive attitude throughout the project, which kept the team motivated."

- **Feedforward:**

Suggest ways to further support team morale.

- **Example:** "Keep using positive reinforcement which helped us resolving the tensions between some group members."

5. Responding to Conflict

- **Feedback**

Comment on how your peer handles differing opinions or conflicts.

- **Example:** "You acknowledged the differing opinions during the team meeting and helped keep the discussion focused on our objectives."

- **Feedforward**

Offer suggestions on managing conflict more effectively in the future.

- **Example:** "In the future, try steering the conversation toward finding a common ground earlier, so we can resolve issues faster."

Structured Approach to Providing Feedback/Feedforward

When reviewing your peer's work, follow these guiding steps to ensure your feedback and feedforward are constructive and actionable:

1. **Be Specific**

Always provide specific examples when giving feedback. Avoid vague statements like "good job." Instead, say, "Your analysis of market trends was insightful and added depth to our strategy. For example... (provide one example to illustrate your point)"

2. **Balance Strengths and Areas for Improvement**

Start by acknowledging the positive aspects of your peer's contributions, then transition into suggestions for improvement. This helps keep the feedback constructive.

- **Example:** "Your presentation was well-organised, and the financial forecast was spot-on. For next time, consider adding more visual data to highlight key insights."

3. **Offer Actionable Suggestions**

Focus on what your peer can do next. Provide clear, forward-looking guidance that can help them improve in future tasks.

- **Example:** "For your next report, try using more explicit examples to support your points. This will make your argument even more compelling."

4. **Encourage Reflection**

Prompt your peer to reflect on your feedback and think about how they can apply it in future projects.

- **Example:** "I think integrating more peer contributions could improve the outcome of the next task."

Key Points to Look For When Reviewing Peers

Criterion	What to Look For in Feedback	What to Suggest for Feedforward	Examples to support your points
Contribution to Team	• Did they actively contribute to the team? • What did they do?	Suggest ways they can engage others more.	
Facilitating Contributions	• Did they help others share their ideas?	Recommend ways to engage quieter members.	
Individual Work	• Was their work to the quality discussed with the team? • Was the work in time?	Suggest ways to further improve depth or quality.	
Team Climate	• Did they maintain a positive atmosphere? • Did they support other students?	Encourage them to resolve tensions positively.	
Conflict Resolution	• Did they handle conflicts constructively?	Recommend focusing on early resolution of conflicts.	

This resource seeks to provide clear guidance for students on how to deliver meaningful, constructive feedback and forward-thinking advice to their peers, ensuring a productive and supportive team environment in both academic and professional contexts.
